PROGRAM

1st Panel

2nd Panel

Steam
Steam helps to remove laundry smell, and improve wahing capacity through instantaneous heating water spray. It is as effective as steam through steam generator.

Quick 20
The 'Quick 20' program is very convenient for washing small loads e.g. sports clothes or underware around 20minutes.

Sports wear
Washing light cotton sportswear in a short period of time, this function is useful for the sports lovers.

Cotton/Normal
This enables heavily soiled clothing to have an extra wash.

Delicate/Hand wash
A washing cycle for soft, delicate clothes.

Memory
Users can program frequently-used cycle. Once programmed, user can recall the setting whenever needed.

Synthetic
This enables your clothes to be less creased after being left in the washing machine.

Rinse+
Additional rinsing of laundry. This helps to remove residual detrgent,m and is recommended in houses with vert soft water.

Delay start
In case user want to program the washing cycle to finish up maximum 12 hours later, this option is useful, especially if different electricity rate are changed based on time zones.

Intensive
If case of heavily soiled clothes, you can extend washing time to remove dirt.

Tub Clean
Use to remove remnant or pollutants stuck on outer wall of a tub.

Drain
Select drain course for effective drain.
